

## RECIPE:        **Gum-Oil Tempera**

Use on sized paper, or canvas.

Dissolve

1 part    **63700 Klucel EF** or **63600 Cellulose Glue K 300** in 9 parts of warm water.

Once the glue is dissolved (after about 2 hrs), warm in a double boiler and add

1 part    **73100 Linseed Oil Cobalt Varnish** dropwise at first, then spoonfuls, and stir constantly.

This medium can be used with pigments or colour concentrates.

Gum-Oil Tempera dries to a beautiful semi-glossy lustre.
