

Shipping of inflammable liquids

The shipment of flammable liquids is legally restricted. The shipment of small containers up to 3 liters is much easier than sending 30-liter canisters.

You will receive 30 liters at a low 30-liter price, but packaged as 10 x 3 liters. These 10 canisters are 2 to 4 cartons, according to Hazmat shipping instructions, and will be sent by UPS.

For products concerned see the following list:
